Order Instituting Investigation on the
Commission's Own Motion to Determine
Whether Pacific Gas and Electric Company
and PG&E Corporation's Organizational
Culture and Governance Prioritize Safety

Investigation 15-08-019
(Filed August 27, 2015)

EMF SAFETY NETWORK COMMENTS ON PROPOSED DECISION

Pursuant to Rule 14.3 of the Commission's Rules of Practice and Procedure, EMF Safety Network (Network) submits these comments on the proposed decision of Commissioner Picker in the Order Instituting Investigation on the Commission's Own Motion to Determine Whether Pacific Gas and Electric Company and PG&E Corporation's Organizational Culture and Governance Prioritize Safety.

Network supports the proposed decision to establish a Commission Advisory Panel on Corporate Governance because improved regulatory oversight is warranted. However, Network would like to see more stated requirement of this new advisory panel that compels PG&E to address the need for detailed, transparent, and public information related to their safety problems. All stakeholders, including customers and those doing the jobs need to be heard. A robust system of safety accountability, one that is driven by customer and worker experience, is urgently and immediately needed to ensure improved future performance and increased PG&E corporate accountability.

Dated: May 28, 2019 at Sebastopol, California.

Respectfully submitted,
