Refine Long-Term Procurement Planning  
Requirements.

R.16-02-007

**SOUTHERN CALIFORNIA EDISON COMPANY'S (U 338-E)  
NOTICE OF *EX PARTE* COMMUNICATION**

Southern California Edison Company ("SCE") hereby gives notice pursuant to Rule 8.4(a) of the Rules of Practice and Procedure of the California Public Utilities Commission ("Commission" or "CPUC") of the following communication:

**DATE AND TIME OF COMMUNICATION:** March 27, 2019 from 1:30 p.m. to 2:10 p.m.

**LOCATION:** Public Utilities Commission, 505 Van Ness Avenue, San Francisco, CA 94102

**WHO INITIATED COMMUNICATION:** SCE

**NAMES AND TITLES OF NON-CPUC PERSONS PRESENT:** (1) Laura Genao, SCE Managing Director of Regulatory Affairs; and (2) Colin Cushnie, SCE Vice President of Power Supply

**NAMES AND TITLES OF CPUC PERSONS PRESENT:** Yuliya Shmidt, Advisor to Commissioner Rechtschaffen

**BRIEF DESCRIPTION OF COMMUNICATION:**

Discussed preliminary analysis indicating a near-term resource adequacy deficiency potentially beginning in 2021 and proposed recommendations to could address the deficiency. Also discussed various elements of procurement, including central procurement/central buyer, retail services, provider of last resort, and SCE's reliability threshold mechanism proposal, and SCE's position on each. Specifically, SCE noted it is interested, as a utility responsible for providing

reliable and affordable service to all of its customers, in being the central buyer for reliability procurement and that the State does not need a new state agency to do centralized procurement given the efficiencies gained by having investor-owned utilities procure. Additionally, with regard to how to address potential future resource shortages, SCE urged the Commission to consider SCE's reliability threshold mechanism proposal, submitted as part of the current Integrated Resource Planning proceeding as a potential means of addressing the resource shortfall if the Commission agrees with SCE's analysis.

**WRITTEN MATERIALS PROVIDED:** No

Respectfully submitted,
